**VISUALL**

DISPLAYING  
ORGANISATIONAL  
DIMENSIONS

## VISUALL DISPLAYING ORGANISATIONAL DIMENSIONS

Does your organization lack overview?  
Are you looking for clarity in the maze of management  
issues that need your attention?  
Visuall offers the solution.

Using Visuall you can map absolutely EVERYTHING. You can reveal and connect multiple aspects of your company simultaneously. You may use it to formalize workflow and process chains, or rules and legislation. But also business risks or complex documents, like your product portfolio, can be made clear and well-organized with Visuall. Visuall lets you be the one who decides which factors are analyzed and structured, and how they eventually will be represented. This way, you always have a tailor-made solution at hand.

## DIMENSIONS & DETAILS

Visuall makes all dimensions within your organization visible and insightful. It lets you decide how many and which aspects will be included, and how they will be represented. These aspects can subsequently be unraveled, and their coherence uncovered. What connections are made and how detailed the reproduction will be, is up to you. The result will be visualized in a clear multi-dimensional model, in which all concerned parties can find themselves back. This way Visuall offers overview for everyone, both the specialists and the generalists within your organization.

## BEYOND VISUALL

If your organization has the appropriate knowledge, you can start using Visuall by yourself, to map complex matters into well-organized structures. If however you need support with respect to content, help implementing Visuall or strategic advice, KMG Consultancy and Juris can be of service to you.

KMG Consultancy uses Visuall to unravel your Business DNA. This produces a blueprint of your organization. What does it look like? Which connections can be identified between the different processes and workflows? How do organizational changes affect your employees and information services, for example? This information will help you take strategic decisions.

If you want to use Visuall in a juridical context, then Juris can assist you. Using Visuall, Juris will create a framework from which legislation can be translated onto the shop floor, and structure can be applied in governance and compliancy policy.

## **VISUALL IN USE**

Visuall has been developed and tested by expert process analysts and jurists. It is used to tackle various complex management issues. A number of financial institutes, insurance companies and government organizations have already gained valuable experience with Visuall.

Visuall's intuitive interface provides for a friendly user experience. You do NOT need to be an ICT expert to be able to use the application. It should be clear however, that you DO need a profound knowledge about the organizational aspects you plan to map using Visuall, in order to be able to understand and use the results.

Visuall makes use of a number of standards in data processing. The final result can be exported to MS Excel, MS Word, MS Visio and HTML formats. This makes it possible to share your model with colleagues in the conference room (using a hardcopy), or publish it on the intranet, for example.

## **WE TEACH YOU ALL VISUALL**

You and your co-workers can learn to use Visuall rapidly, through a training offered to you by Visuall BV. The user-friendliness of the product ensures a relatively short instruction time. Naturally, we are happy to tailor the training to your company's needs.
